**Kitchen Lighting**

Bring your kitchen to life with carefully chosen and thoughtfully placed lighting fixtures, and be sure to make the most of them with innovative GE bulbs. Whether preparing a meal or hosting a casual get-together, you'll love how multiple layers of light can change your kitchen's mood to suit the moment. A well-designed plan provides ideal lighting for every mood.

To fill your room with clean, beautiful light®, choose GE Reveal® bulbs. They filter out the dull, yellow rays produced by standard incandescent bulbs, bringing out colors and patterns that may normally go unnoticed.

**Living Room Lighting**

Living rooms and family rooms function as both a relaxing getaway for the family and a place to entertain guests. Create maximum flexibility and impact by carefully planning the lighting sources in this room. With multiple layers of light, you'll be ready for game nights, quiet entertaining, reading or movie watching.

**Dining Room Lighting**

Make your dining room both fashionable and functional with multiple lighting options and innovative GE bulbs. Once used only for special occasion dining, a smartly lit dining room can also be a work zone or casual gathering place. For the best balance and maximum flexibility, opt for layers of light throughout the room.

## **Bedroom Lighting**

Not just for sleeping, these more private spaces need flexible lighting that can change from functional to romantic to suit the need and mood of the moment. A simple lighting upgrade is an easy way to create a bedroom that's both comfortable and flexible. By using layers of light, this personal space can quickly transform from a busy dressing area to a quiet space for reading and studying, to a romantic getaway.

## **Bathroom Lighting**

Create a bathroom that's both functional and flattering by choosing the light bulbs and fixtures for all your needs. By using multiple layers of light in your bathroom, you'll get full, balanced light for applying makeup, or you can use layers individually for a softer, nighttime ambiance.

## **Outdoor Lighting**

Traditionally, considered a way to add security and light walkways, outdoor lighting is also a great way to add drama and curb appeal to your home. Strategically placed fixtures with state-of-the-art GE outdoor bulbs, create beautiful focal points.
