Power Tools >>

Industrial Strength Power Tools, Cordless

Makita engineers and manufactures innovative cordless tools. Our goal in designing any cordless tool is to allow all the convenience cordless offers without sacrificing the power or efficiency of a corded tool.

Lithium-Ion Tools: 18V Power. 12V Weight.

Makita's LXT Series has been designed specifically for Lithium-Ion technology with less weight in a more compact size. The 4-pole maximum torque motor delivers more efficient power in a compact size. Furthermore, energy is generated every 90° rather than 180° on the magnetic field and the motor is supported with two steel ball bearings for more durability. LXT is 40% less weight and more compact. The better ergonomic shape fits like a glove with even pressure while adding more control.

Makita LXT Lithium-Ion Batteries and Optimum Charging System produces 280% total lifetime work with 2x more battery cycles than the traditional Ni-Cd batteries.

Years Ahead of the Competition:

Makita's advances in motor technology have led to the development of our new two-piece, max torque, 4-pole motor found in the new LXT Lithium-ion Cordless Drill Series. This new motor delivers power, efficiency and serviceability in a more compact size.

Makita Advantages:

- 4-Pole Motor - generates energy every 90° rather than 180° on the magnetic field
- Dual Ball Sealed Ball Bearings - less friction and greater efficiency
- Replaceable Armature - allows for greater serviceability
- Larger High Performance Fan - reduces temperature and increases tool life

- High-Grade Refined Ferrite Magnet - generates maximum performance
- Thicker Armature Shaft - handles greater torque for heavy-duty applications

Advancing Cordless Technology:

Makita is proud to be the industry leader in battery and charger technology. Nowhere is this more evident than with our LXT Lithium-ion battery and charger system.

Makita continues to set the standard for quality, reliability and performance by manufacturing innovative power tools. Since our first cordless drill was introduced nearly 30 years ago, we continue to respond to the needs of professionals.
