Composite Decking Material

A.E.R.T., Inc. has manufactured composite building products since 1988. With over 20 years of experience in the industry, A.E.R.T. is able to produce high quality composite building components for millions of fashionable homes across America. Professional builders rely on the value and consistency that A.E.R.T. is known for in composite building products.

A.E.R.T. composites were first placed into commercial use in 1989 as thresholds, bottom door rails and sub sills for several national door companies, including Peachtree and Therma-Tru Doors. The company introduced its first decking products in 1992.

A.E.R.T.'s composites resist swelling, rot and termites that are particular problems for exterior building components. Millions of homes have A.E.R.T. composites installed in their doors, windows, and decks making them more comfortable, easier to maintain and longer lasting.
