Foundation Flood Vents

Education and code knowledge is important, but of equal importance is the manufacturing of a quality product. After a detailed search, we chose Sargent Metal Fabricators in Anderson, SC to manufacture our vents. This ISO 9001 certified manufacturing plant utilizes state-of-the-art laser and punch press technology, lights out nighttime automation, and demand flow assembly to ensure quality, and guarantee on-time delivery. Unlike most traditional assembly houses, our parts are manufactured on one line, and then delivered in small batches to the assembly line. In-line inspection through every process, along with final wet flood-proofing tests, provides us with excellent quality. Over 90% of your orders ship the same day they are ordered.

Today we are proud to offer a family of products that meet every flood venting application. Our team of dedicated employees is available to answer all questions, provide AIA approved seminars, assist in locating an authorized installation expert, or assist in locating an authorized Smart VENT dealer near you. Through every step of our growth, your comments, ideas, and suggestions have helped guide us to provide you with great flood venting solutions. We appreciate your help and business, and we look forward to helping all of our valued customers in the future.
