Lubricant

Known as "the can with a thousand uses," WD-40 protects metal from rust and corrosion, penetrates stuck parts, displaces moisture, and lubricates just about anything. WD-40 is also great when it comes to cleaning grease, grime, and other marks from most surfaces.

WD-40 is truly one of the most versatile, multi-purpose problem solvers on the market! It protects metal from rust and corrosion, penetrates stuck parts, provides a great moisture barrier, and lubricates just about anything. WD-40 also specializes in the removal of all kinds of gunk. Need to clean off grease, grime, or gum? Adhesives from tape, labels, or stickers? WD-40 is the answer--there are literally thousands of uses!

CLEANS: WD-40 gets under dirt, grime and grease to clean. It also dissolves adhesives, allowing easy removal of labels, tape, stickers, and excess bonding material.

DISPLACES MOISTURE: Because WD-40 displaces moisture, it quickly dries out electrical systems to eliminate moisture-induced short circuits.

PENETRATES: WD-40 loosens rust-to-metal bonds and frees stuck, frozen or rusted metal parts.

LUBRICATES: WD-40's lubricating ingredients are widely dispersed and hold firmly to all moving parts.

PROTECTS: WD-40 protects metal surfaces with corrosion-resistant ingredients to shield against moisture and other corrosive elements.
